CHRIS JARVIS

Software Engineer

📞 +1-307 680 6321   @ jarvis@highplainsmedia.com   📍 2704 Ridgecrest Drive, Gillette, WY

SUMMARY

Full Stack Developer with 7+ years of experience building and modernizing scalable e-commerce platforms. Skilled in JavaScript, Node.js, React, Vue, Next.js and WCAG-compliant design. Proven track record of driving team collaboration, mentoring developers, and optimizing application performance to deliver user-centered solutions for top-tier brands like Fabletics and Savage X Fenty.

EXPERIENCE

Senior Software Engineer

TechStyleOS

📅 2020 - Present   📍 Remote

TechStyleOS is the globally integrated Operations and Services provider behind some of the fastest growing online fashion brands in history, including Fabletics, Savage X Fenty, JustFab, ShoeDazzle, and FabKids. I work as a full-stack developer here, responsible for building, deploying and maintaining customer facing web applications.

- Worked with multiple teams (db ops, platform architechts, senior and staff engineers) to build and support REMIX a modernized e-commerce web application comprised of FabKids, ShoeDazzle, and JustFab.
- Accessibility Implementation: Ensured all customer-facing applications meet WCAG guidelines.
- Maintained and built full stack features for e-commerce websites.
- Worked on building and supporting Split Orders (drop shipping capability) on the frontend React app and Backend GraphQL Node.js/Coldfusion APIs.
- Worked with staff and senior engineers to review code and ensure best practices and performance throughout our applications.
- Mentored junior level engineers and supported them by answering their questions and teaching them about our technology stack.

Front End Software Engineer

TechStyleOS

📅 2018 - 2020   📍 Remote

TechStyleOS is the globally integrated Operations and Services provider behind some of the fastest growing online fashion brands in history, including Fabletics, Savage X Fenty, JustFab, ShoeDazzle, and FabKids. I worked as a Front End Software Engineer here, responsible for building, deploying and maintaining customer facing web applications.

- Maintained and built features for FabKids e-commerce website.
- Modernized the FabKids checkout flow, converting the codebase from Coldfusion/cfml components to Vue.js/Node.js api with no prior Vue.js experience.
- Ensured compliance with WCAG standards during modernization efforts
- Improved usability for all users, emphasizing focus states, screen reader enhancements, and keyboard navigation.
- Worked closely with merchandise team to Implement numerous A/B tests and features to improve customer acquisition and lead conversion.
- Worked on a large webpack upgrade which laid the groundwork for other brands under the JustFab umbrella to follow suit.

Full Stack Javascript Developer

Scriptd

📅 2017 - 2018   📍 Remote

Scriptd is was a startup application in the film industry that connects scripts to actors and directors as well as provides a social way to read through scripts on mobile devices.

- Worked with a team of three developers and used AGILE methodology.
- Built frontend react components that communicated with a firebase database.
- Built command line tools to enhance our day to day work.

SKILLS

Client-Side

HTML   CSS   JS   React   Vue

Redux   TypeScript   Bootstrap

JQuery   Storybook   Next.js   A11Y

WCAG

Server-side

Coldfusion   TypeScript   SQL

NodeJS   GraphQL   Express

Development & Operations

Continuous Integration   Mocha   Jest

Scrum   Agile   GIT

Azure Data Studio   Jenkins   Netlify

Segment.io   Graylog   Fusion Reactor

Docker   Insomnia   Postman

STRENGTHS

Communication

Attended RISE IC program for 12 weeks learning and practicing communication, strategic thinking, delivery and career growth skills.

Continuous Education

I love learning new technologies and am able to retain and implement them in a short amount of time. When I first started at TechStyleOS I had no knowledge of Coldfusion or Vue.js and was able to pick it up quickly and start shipping features.

Resilience

I have worked on emergency outages and in high stress situations during my time at TechStyleOS and am able to keep a level head and think clearly to fix urgent issues.

EXPERIENCE

SCADA Electrician/Integrator (Journeymen)

City of Gillette

📅 2015 - 2018   📍 Gillette, WY

City utility company where I worked as a SCADA PLC programmer.

- Built HMI's that city employees in water and waste water divisions interact with on a daily bases. HMI's that control pumps, tanks, and flow of the different systems throughout the city.
- Installed electrical systems to support the different city utility divisions, running conduit, wiring PLC systems and construction of new Utility buildings.

EDUCATION

Full Stack Bootcamp (React | Node.js)

Thinkful

📅 2017 - 2018   📍 Remote

Web Development Self Study

Free Code Camp | Udemy | Frontend Masters

📅 2015 - 2017   📍 Remote

Associates in Industrial Electricity

Gillette College

📅 2010 - 2012   📍 Gillette, United States
